WHEN PERFORMING

HOUSEHOLD  
AND  
VEHICLE  
MAINTENANCE

# Storm Water Pollution Prevention:

It's Up to Us

## Prevention during household and vehicle maintenance: What Can You Do?

### General Practices

- △ Never use the gutter or storm drain system for disposal of household waste.
- △ Store toxic products and chemicals indoors or in a shed or storage cabinet.
- △ Take unwanted hazardous materials and containers to the household hazardous waste disposal facility.
- △ Don't wash into the street or parking lots. Do not wash tools and equipment in driveways, gutters or drainage ways.

### These Actions Are Prohibited By Law!!!

A Household Hazardous Waste Facility is located at the Trans-Jordan Landfill, 10473 South Bacchus Highway (U-111), South Jordan. Business hours are Monday through Saturday, 7:00 am to 6:00 pm.

Call (801)971-1976 for more information.

### Automotive Best Practices

- △ Take used motor oil and antifreeze to a recycling center or household hazardous waste facility.
- △ Inspect and maintain vehicles to reduce leakage of fluids.
- △ Reduce automotive emissions through regular maintenance and by limiting vehicle usage.
- △ Clean up spills with kitty litter or absorbent material. Dispose of cleanup as hazardous waste.
- △ Vehicles should be washed at a commercial car wash. Vehicles can be washed on the lawn with biodegradable soap to reduce wash water flows to the storm drain system.
- △ Avoid washing into the street or parking lots.

Recycling used oil could reduce national petroleum imports by 25.5 million barrels per year!

In the Salt Lake Valley, storm drains flow directly to local creeks and rivers with **NO treatment**. Degradation of storm water is a serious problem for wildlife dependent on our waterways and for the people who live near streams or use them for recreation. Some common sources of contaminants in storm runoff include:

- Spilled oil and fuel fluids from vehicles and heavy equipment
- Construction debris
- Landscaping runoff containing pesticides or weed killers
- Materials such as used motor oil, antifreeze, or paint products that people pour or spill into a street or storm drain

Herriman City has developed a Storm Water Management Program to educate local residents and businesses and to improve the quality of storm water runoff. We hope you will join us by using the recommended methods (referred to as Best Management Practices) described in this pamphlet.

### Who Should Use this Pamphlet?

- Home builders*
- Developers*
- General contractors*
- Sidewalk and patio construction workers*
