WHEN PERFORMING

Storm Water Pollution Prevention:

It's Up to Us

In the Salt Lake Valley, storm drains flow directly to local creeks and rivers with **NO treatment**. Degradation of storm water is a serious problem for wildlife dependent on our waterways and for the people who live near streams or use them for recreation. Some common sources of contaminants in storm runoff include:

- Spilled oil and fuel fluids from vehicles and heavy equipment
- Construction debris
- Landscaping runoff containing pesticides or weed killers
- Materials such as used motor oil, antifreeze, or paint products that people pour or spill into a street or storm drain

Herriman City has developed a Storm Water Management Program to educate local residents and businesses and to improve the quality of storm water runoff. We hope you will join us by using the recommended methods (referred to as Best Management Practices) described in this pamphlet.

Who Should Use this Pamphlet?

- Automotive Businesses**
- Developers**
- General contractors**
- General Businesses**

www.herriman.org/storm-water/

Prevention during industrial management practices:

What Can You Do?

General Practices

- △ Never use the gutter or storm drain system for disposal of household waste.
- △ Store toxic products and chemicals indoors, in a shed, storage cabinet, or a covered containment area.
- △ Take unwanted hazardous materials and containers to a hazardous waste disposal facility.
- △ **Develop Standard Operating Procedures** on storage, disposal and cleanup of hazardous materials.
- △ **Train all employees on Standard Operating Procedures** to insure pollution prevention.

Spill Response

Herriman City Emergency Dispatch
Monday through Friday 7:30 am to 5:30 pm
(801)446-5323

After hours (801)446-5323 option 2

Local Pollution Control Agencies:
Salt Lake County Health Department
Emergencies (801)580-6681

Automotive

- △ Take used motor oil and antifreeze to a recycling center or a hazardous waste facility.
- △ Inspect and maintain vehicles to reduce leakage of fluids.
- △ Reduce automotive emissions through regular maintenance and by limiting vehicle usage.
- △ Clean up spills with kitty litter or absorbent material. Dispose of cleanup as hazardous waste.
- △ Vehicles should be washed at a commercial car wash, or inside with correct drainage to a sewer separator system.
- △ Avoid washing into the street or parking lots! Do not wash vehicles, tools or equipment in drive-ways, gutters or drainage ways.

These Actions Are Prohibited By Law!!!

For more information contact the Herriman City Storm Water Division during regular business hours, Monday - Friday 7:30 am to 5:30 pm.
