

UNIFIED FIRE AUTHORITY

Certified Fire Flow Testing

Attention Owners, Developers & Builders,

An independent fire flow analysis is required for all new commercial or residential subdivisions, new commercial buildings, new residential homes that exceed 6,200sqft. and all residential homes built in the wildland-urban interface areas. Contact one of the companies below and request a fire flow analysis. Advise the company that this test must be scheduled with the Herriman City Municipal Water Department, (801) 446-5323.

Fire Chief

Michael H. Jensen

Deputy Chief

Gaylord A. Scott

UFA Board

Roy Tingey
Chair

Tom Pollard

Dennis Webb

Approved Companies:

Protection Consultants Inc. (PCI)
(801) 596-1601

VanBoerum & Frank Engineering
(801) 530-3148

Craig Blue, P.E. (801) 886-3473

J D Browning Engineering (801) 503-1821

Assessment of adequate fire flow is part of the fire department plan review process. The fire department needs to know that the available fire flow is sufficient to support your project. Please submit (3) copies of the test results with your plan review submittal. Final fire department approval will not be given on subdivisions or the release of building permits until this information has been received and reviewed.

Respectfully,

Dan DeVoogd
Fire Inspector
